-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-31, drawn to a an apparatus and method for over-the-air (OTA) activation of a wireless unit in a particular communications system, comprising steps of: receiving a wireless unit parameter and a verification number over-the-air wherein the verification number has been generated by using an authorization algorithm and the wireless parameter includes an ID of the particular communications system; generating a trial verification number using the authorization algorithm; and comparing the received verification number to the trial verification number, classified in class 455, subclass 419.
  - II. Claims 32-97, drawn to an apparatus and method for locking/unlocking unit for communications comprising steps: receiving an input code and comparing the input code to a stored unlock code, classified in class 455, subclass 411.
2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [I] has separate utility such as receiving a wireless unit parameter and a verification number over-the-air wherein the verification number has been generated by using an authorization algorithm and the wireless parameter includes an ID of the particular communications system; generating a trial verification number using the authorization algorithm; and comparing the received verification number to the trial verification number. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed.
